PROFESSIONAL SUMMARY

Motivated Fullstack Software Engineer with hands-on experience building and deploying production-ready web applications using Next.js, React, Node.js, Express.js, MongoDB, and TypeScript. Experienced in real-time systems with Socket.io, multi-tenant SaaS architecture, role-based authentication, and third-party API integrations. Strong problem-solving mindset with a focus on clean code, scalable architecture, and continuous learning.

TECHNICAL SKILLS

Frontend: React.js, Next.js 15, TypeScript, Tailwind CSS, Framer Motion, React Native (Expo)

Backend: Node.js, Express.js, Socket.io, REST APIs, NextAuth.js, JWT, bcrypt, Nodemailer

Database: MongoDB, Mongoose, MongoDB Atlas

Tools & Platforms: Git, GitHub, Vercel, Cloudinary, Linux/Ubuntu, Postman

Languages: JavaScript (ES6+), TypeScript, Python

PROJECTS

ServiceDesk — Omnichannel Customer Support SaaS <https://service-desk-alpha-one.vercel.app>

React • TypeScript • Socket.io • Framer Motion • Node.js • Express.js • MongoDB • Mongoose

- Built a multi-tenant SaaS platform where companies register, onboard agents via company slug, and manage customer support in a unified workspace
- Implemented real-time bidirectional communication using Socket.io — agents see live ticket pickup status, customers see agent online presence
- Designed a subscription-based agent seat model where companies can start with up to 3 agents and scale by upgrading their plan
- Built separate frontend (React/TypeScript) and backend (Express/MongoDB) repositories with clean API boundaries
- Architected multi-tenant data isolation ensuring each company's tickets, agents, and customer conversations remain fully separate

Vero Homes — Real Estate Platform <https://vero-homes.vercel.app>

Next.js 15 • TypeScript • MongoDB • NextAuth.js • Cloudinary • Tailwind CSS

- Built a fullstack multi-role real estate platform for Nigerian property listings with buyer, agent, and admin roles
- Implemented JWT-based authentication with NextAuth.js and role-based access control across all routes
- Developed admin approval workflow and REST API with filtering by city, type, price range, and bedrooms
- Integrated Cloudinary for multi-image uploads with automatic optimization and CDN delivery

ForexPro Dashboard — Forex Trading Platform <https://forex-dashboard-wheat.vercel.app>

Next.js 15 • TypeScript • MongoDB • Recharts • Twelve Data API • NewsData.io

- Built a multi-user forex trading dashboard with live currency prices, interactive charts, and trade journal
- Integrated Twelve Data API for real-time forex price feeds across 8 major currency pairs with auto-refresh
- Developed portfolio analytics with equity curve, P&L breakdown by pair, win rate, and profit factor calculations

- Integrated economic calendar API and NewsData.io live forex news feed
-

WORK EXPERIENCE

Backend Developer (Freelance) | Computer School Website 2024

- Designed and built a Node.js/Express backend with RESTful APIs, JWT authentication, and Nodemailer email notifications
- Collaborated with a frontend developer to integrate the backend with the client-facing interface

WordPress Developer (Freelance) | BeeCollectibles 2023 – 2024

- Built and configured a WooCommerce e-commerce store with payment gateways and product catalog management
- Delivered a fully functional online store enabling the client to begin selling products immediately

Customer Service Representative | Sharp Courier 2025

- Handled customer inquiries and logistics support, developing strong communication and problem-solving skills
-

EDUCATION

B.Sc. Computer Science & Robotics Education | University of Nigeria, Nsukka 2024

Second Class Lower Honours

JavaScript Algorithms & Data Structures — Udemy Certificate

Node.js & React — Udemy (in progress)

NATIONAL YOUTH SERVICE CORPS (NYSC)

Corps Member | NYSC Nigeria August 2025 – August 2026

- Completing mandatory national service while actively building fullstack projects and pursuing engineering roles
